

The Essential 8 by Truis, the Foundation to Cyber Resilience

The Australian Cyber Security Centre (ACSC), based within the Australian Signals Directorate (ASD), has published a useful set of online resources that discuss the controls to put in place to keep your organisation secure.

While no set of mitigation strategies are guaranteed to protect against all cyber threats, organisations are recommended to implement eight essential mitigation strategies from the ACSC's Strategies to Mitigate Cyber Security Incidents as a baseline. This baseline, known as the **Essential Eight (E8)**, is designed to increase the security posture of your IT systems and make it harder for adversaries to compromise your organisation.

The eight mitigation strategies that will help protect your organisation include:

While these strategies aim to help businesses mitigate the likelihood or impact of threats, it must be noted that the Essential Eight outlines a minimum set of preventative measures. Businesses must also be prepared to implement further measures where necessary, based on their industry, environment, infrastructure, etc. Again, no set of measures can fully protect any given business or organisation, but The Essential Eight is an excellent point to start at, or review to ensure you're following the measures as closely as possible.

Truis understands security.

We work closely with our vendors, and we have our own security specialists on staff to ensure our clients are getting the right security awareness training, assistance, and analysis needed to help them prepare their business for what the future might hold. We can help you navigate this tricky journey, managing everything from endpoints through to servers, and even help educate your staff in identifying phishing emails - one of the most common attack vectors on businesses - through security awareness campaigns and training.

Is your organisation harnessing some of the Essential Eight emerging technologies?

Truis offers a comprehensive suite of Essential Eight Maturity Services that address every stage of the cybersecurity journey, from initial assessment to ongoing managed support.

Essential Eight Maturity Assessment:

We comprehensively assess your organisation's cybersecurity posture against the Essential Eight mitigation strategies. Our evaluation delivers a detailed report on your current maturity level, pinpointing any gaps or vulnerabilities in your security posture, based on your desired (or required) maturity level.

Essential Eight Maturity Remediation:

Building on our assessment, we craft and implement tailored remediation plans to address identified gaps, fortifying your cybersecurity posture. This may involve bolstering access controls, patching vulnerabilities, or incorporating new security technologies and processes.

Essential Eight Maturity Managed Services:

Our ongoing managed services provide continuous monitoring, incident response support, and proactive security maintenance for sustained cybersecurity effectiveness. This ensures the perpetuation of your maturity level, allowing your organisation to adapt seamlessly to evolving cyber threats.

Benefits of Our Essential Eight Maturity Services:

- Reduced risk of cyberattacks and data breaches.
- Provides clarity on your organisations Essential Eight alignment.
- Reduced risk of cyberattacks and data breaches.
- Enhanced compliance with industry standards and regulations.
- Stronger protection of sensitive information and assets.
- Increase confidence in your organisation's cybersecurity posture.
- Continuous support to maintain the achieved maturity level.

Our Essential Eight Maturity Assessment, Remediation, and Managed Services provide the expertise and guidance you need to elevate your cybersecurity posture, safeguard your critical assets, and achieve a sustainable state of cybersecurity excellence up to a **Maturity Level Three** rating, the highest level of cybersecurity maturity under the Essential Eight framework.

Why Truis?

Access to IT experts that are highly experienced and accredited.

Outcome-based solutions designed to deliver an exceptional experience and free your internal resources.

Local Project Managers governing the delivery of your IT solutions.

Contract flexibility allowing you to scale as your business grows and your need evolve.

Partnering with an ISO27001 & ISO9001 accredited service provider.
