

Truis

Back up as a service

Back Up as a Service (BaaS)

Truis Back Up as a Service (BaaS) is a reliable, secure, managed cloud backup and recovery service that helps avoid having to invest in a lot of additional hardware.

We'll manage the entire backup process, providing you with a user-friendly dashboard to manage your data in the cloud.

Delivered on a subscription basis and billed monthly, we provide different approaches to data protection to meet different customer requirements. Every solution is designed to solve the challenges of traditional backups, and provide a scalable, risk-free solution.

Backup as a Service (BaaS):	Provisioning and management of backup infrastructure on customers' premises.	<ul style="list-style-type: none"> • Veeam Licensing • Provisioning of Veeam Proxy and/or VBR, • On-prem storage • Capacity storage at Truis Data Center • Management and monitoring of the service

Bespoke solutions

Sometimes you don't need a one-size-fits-all, off-the-rack solution.

From the smallest service, through to a comprehensive solution. We provide truly bespoke service packages that can grow with your business and its needs. By taking your business's measurements, we'll understand the cut of your cloth to effectively tailor a managed services solution for you.

Creating a bespoke solution means you're working within a system that is the most cost-effective and efficient for your business's specific needs. It also means having a team onhand who truly understand the IT operations of your business, and how technology can improve you day-to-day operations.
